

Enterprise Pack

The Enterprise

Pack is available for companies or organisations that require a fully content managed site. These are powerful, highly functional, configurable and feature rich systems. It enables the client complete control over content and can be edited and updated via a word processor type interface...

If your need is for a site that requires frequent content updates, articles, news and images, no matter how small or large, then you would benefit from a Content Management System. For example, reservations, recruitment, community or 'magazine' driven sites would need fast changing content. These systems give you complete control over your site which is accessed via a secure password protected "admin area". You can login with the use of your favourite browser and use a "word type" interface to edit your pages.

The possibilities are massive when using CMS. You can integrate many different functions to suit your needs, for example:

- Professional image and mulimedia galleries
- Portfolio's and product catalogues
- Community based Forums
- Help Desk ticket systems
- Business Listings/Directory Services

- Private Client area's
- Email Newsletters
- Banners and Advertising
- Subscription Services
- Wiki's
- Data Collection
- E-commerce or online shops

The possibilities are limitless. If you have a project in mind or a very bespoke idea, please contact us so we can talk about your requirements, we are sure there will be something for you. The Enterprise Pack starts at £1500 and includes the below as standard:

- Up to 12 pages of content including a 'Contact Us' page
- Up to 20 images
- CMS installation and setup with functions as specified by client
- Hosting software setup
