

## The Taxi Man

Site description: Date: June 2009

Client: The Taxi Man

- Website: [www.taximanbraintree.co.uk](http://www.taximanbraintree.co.uk)

The guy's at the new taxi firm 'The Taxi Man' had already seen some of our other work we have completed for other transport sites. They knew exactly where to get theirs done... right here at Firebrush!

Darren, from the Taxi Man knew exactly what he wanted from a site to promote his new business. Working with him we came up with a clean site that matched his company branding and stands out above the rest. Easy to navigate, contains all the contact information right on the home page where it can't be missed.

Darren informs us that after we created a Google ad campaign and got him listed nice and high, he has been getting some great work through the site. Along with some encouraging comments from customers about how fantastic the new site looks, it's been a much needed boost to his business!
